

Back to school

safety and sustainability for our children

It's that time again to get ready for a new school year. What many of us don't realise is the hard work that goes into ensuring our schools are a safe and environmentally aware space for our children to learn in.

School equipment has to meet health and safety standards for children to work, play and eat in a safe environment. As well as safety many schools are also working towards becoming sustainable. As many public sector budgets are being cut small businesses are being affected by a reduction in orders for school equipment and machinery.

How we can help our schools

In order to survive in today's economy it's our responsibility to assist schools in becoming sustainable as well as safe, and ensuring we are able to provide them with the products and services they need to achieve a sustainable status.

Many schools have started on their road to sustainability by installing automatic lights, installing **water saving electronic taps** in toilets and kitchen areas, using **recyclable stainless steel** equipment, installing **water saving pre-rinse heads** on canteen/kitchen pre-rinses and **recycling** all waste, and much more.

Here at Die-Pat Divisions in Daventry we've taken it upon ourselves to ensure we're able to support schools to become sustainable while still meeting the health and safety standard for each of our products by offering:

- Electronic water saving taps
- Recyclable stainless steel water drinking fountains
- Recyclable stainless steel sink bowls and taps for both toilets and kitchen/canteen areas
- Recyclable stainless steel janitorial units
- A **new** water conserving head for pre-rinse units used within kitchen/canteen area

We're going Green!

As well as offering these products we're also conscious we need to be sustainable and protect the environment ourselves, so we've started by reducing carbon emissions, recycling all packaging and using recycled packaging, recycling all waste and reducing our energy consumption. The savings we gain from becoming a sustainable company can then be passed onto our customers on the road to helping them achieve the same goals.

If you would like to find out more about our range of products please contact us on **01327 311144** or email us at enquiries@die-pat.co.uk

The Die-Pat low price guarantee

July 2011 marks 45 years since Die-Pat was formed.

Look out for more information in our next edition of Wavelength regarding our special '45 year anniversary offers', but for now, here's a little history about the last 45 years...

The company has seen many changes since its formation, but during that time we have always tried to stay true to our core business and customers. In fact,

many of our customers that we began supplying in the 1960s are still customers today.

The Die-Pat name was created from the Steel Dies and Wooden Patterns originally produced for a customer's prototype aircraft propellers and under carriages (one being for the Hawk Harrier Jump Jet). In 2006 the company moved from a smaller 14,000sq.ft premises to our current 49,000sq.ft site in Daventry.

Die-Pat has evolved over the last 45 years greatly broadening its product range in the process, and is now the leading distributor of catering hardware in the UK.

That's just a few highlights from recent years. Look out for the next edition of Wavelength for more details and anniversary offers. As well as celebrating the success of the last 45 years we are really looking forward to the next 45 years!

New team member

We would like to welcome a new member to the team: Claire Hendrie joins our marketing department on maternity cover. Claire has a degree in Advertising & Marketing Communications and has worked for some very well known organisations including Jaguar Cars and Warwickshire & West Midlands Police. More recently, Claire worked as Communications Manager for the West Midlands Criminal Justice Board. In her spare time, Claire is a part time swimming teacher for Water Babies. A very warm welcome Claire!
